

SCREENGUARD™ SEMI-AUTOMATIC SCREEN FILTERS

BIGGER, BETTER, EASIER

DESCRIPTION

Netafim Screenguard™ Semi-Automatic filters are super-easy to clean and provide the best irrigation protection in the industry thanks to the largest filtration area in the market.

APPLICATION

- Primary filtration for small holders, for use with well water and/or single use dripperline applications
- Primary filtration for landscaping applications
- Secondary filtration for media filter systems and sand separators
- In-field secondary filters for enhanced protection

FEATURES & BENEFITS

- Extremely large filter area results in lower labor cost due to longer cleaning intervals even with dirty water
- Simple to clean, the screen can be perfectly cleaned with a single turn of the handle without disassembling the filters and without disrupting the irrigation process
- Ease of installation and maintenance
- The plastic filter housing and cover are molded from high quality engineered plastic for mechanical strength, durability and non-corrosiveness
- The Semi-Automatic assembly can be installed on all Netafim manual Screenguard™ plastic filters
- The filter screen cylinder is molded with stainless-steel 316 screen incorporating a special weave, providing an extra layer of protection to the irrigation system and making it easier to clean
- A wide range of models with multiple filter area options covering a wide range of flow rates, ensures a perfect fit for different water quality and protection requirements
- Multiple configurations and connection types ensure a perfect fit with any irrigation system
- Different micron rating screens suited to a variety of applications
